
BANKS WILL FINANCE THE GRAIN MOVEMENT

Financial Institutions Will Not Gain Disposition of the Grain. Year, Refusing to Provide for Handling the Crop.

Winnipeg, August 20.—With the prospect for the largest aggregate crop in the history of the West there is no public anxiety in respect to the ability of our financial institutions to meet the strain thus put upon them. There are two factors which mainly contribute to the success or otherwise of this task. The first is the general financial conditions as they may arise in the process of carrying out a work of this character.

Under the first head it may be stated that there will, of course, be less discount on the part of the public this year than in 1925. At that time the continued policy of the banks had to be the contraction of credits and the limitation of loans. In the twelve months which have elapsed, there has been a general relaxation of the policy of our banking institutions, that according to the statement of a prominent bank official in the city, the credit business of the West is to be fully improved by at least 20 per cent. while the extension of credits for speculative grain buying will be as free as in any year previous to 1925. In all other respects the legitimate demands of the farmers and grain trade in general will, without doubt, be met.

Favorable Comparison. The last bank statement issued, which is for the month of June, shows some very favorable comparisons with the same month a year ago. The circulation has increased by \$5,000,000, and the deposits in Canada by about \$2,000,000. The current loans outside of Canada have decreased \$2,000,000, while the call loans have increased about \$5,000,000. In addition to the improvement in the circulation, which these figures indicate, there will also be a larger note circulation than ever heretofore, as the banks will be able to take advantage of the Dominion Act allowing them to expand their circulation during the crop period of the year.

Price to this year no financial institution would dare go within a fairly wide margin of its limit of circulation, owing to the severe penalty of exceeding it imposed by the Dominion Act. Under the new Act, however, if the circulation does exceed the limit, the excess circulation for the crop period, it will simply be necessary for the banks to pay the rate of interest which the government demands for the excess circulation for the crop period.

On November 30th last, the total notes in circulation of our Canadian banks was \$84,452,589. The amount of their paid-up capital, which is the limit of their ordinary note circulation, is \$20,000,000, and during the coming fall it is not unreasonable to predict that at least this amount will be issued, and in circulation by the Canadian banking institutions, thus one item representing approximately \$12,000,000 more than has ever been in circulation before.

PLANS UNION LABEL WEDDING. Secretary of A. F. of L. Sends Out Invitations, Bering Stamp. Washington, August 20.—Handsome engraved wedding invitations bearing a union label are now being mailed by Washington. The invitations announce the forthcoming marriage of Frank Morrison, member of Chicago, now secretary of the American Federation of Labor, and Miss Alice Howell, who for eight years has acted as his chief bookkeeper. The unique ceremony of the union label wedding is ascribed to Mr. Morrison's intention to organize labor, and in labor circles it is taken to show that there is a way, even in love, for the man to show his loyalty to the cause for which he daily works. Mr. Morrison will make an extended tour through the West. Mr. Morrison is a widower, his wife having died about six years ago.

Liberal Getting Busy. Montreal, Aug. 19.—Robert Liberal has been nominated Alfred Levesque, for the commons.

MAY RECOVER DIVIDENDS. Current Half Year Should Show Big Increase in G.T.R. Earnings.

Montreal, August 20.—General Manager Charles M. Hays announced yesterday the situation shown by the statement of the Grand Trunk Railway Company, with its passing of all dividends save those on the guaranteed stock. He was fairly cheerful as to future prospects.

"It is expected," he said, "that the earnings of the second six months will be the heavy portion of the year. It will be at least sufficient to permit of a resumption of dividends on the first and second preferred stocks."

"To what do you attribute this reduction in earnings?" he was asked. "To the same causes which have led to the heavy portion of the year, to reduce their dividends. This is, in heavy dependence on the operation of the railways to reduce their expenses correspondingly. We are all doing less business than last year, but the rates of pay of our employees are higher than last year, while the cost of fuel and supplies of all sorts has not gone down with our earnings. All through the United States and Canada the earnings of the railways for the year so far are down from 16 to 18 per cent. in gross, and very few of them have been able to make corresponding reductions in their expenses."

Asked as to how this position was to be met, Mr. Hays said: "All the railways hesitate to make any attempt to reduce the pay of their employees, but a question whether they are not entitled to all they are getting. Neither the Grand Trunk nor any other railway is an exception. The rates of pay are higher than last year, but the rates of pay of our employees are higher than last year, while the cost of fuel and supplies of all sorts has not gone down with our earnings. All through the United States and Canada the earnings of the railways for the year so far are down from 16 to 18 per cent. in gross, and very few of them have been able to make corresponding reductions in their expenses."

When receipts fall off you can only secure them and thereby by reducing expenses or increasing receipts. But there is no other solution. When receipts fall off you can only secure them and thereby by reducing expenses or increasing receipts. But there is no other solution. When receipts fall off you can only secure them and thereby by reducing expenses or increasing receipts. But there is no other solution.

FUNERAL OF 2,000 SPARROWS. Chicago Children Held Burial Service—Birds Killed by Storm. Chicago, Ill., August 20.—Two thousand birds were killed by the terrible storm of Tuesday and Wednesday in the greater West. Sixty and a half children in the neighborhood paid their last respects. With children, men and women, the funeral of the birds was indeed a curious affair to those here and points who offered this prayer: "We are very sorry, O God, that all the poor birds had to die, for we would like to have them stay around in the trees, but we need rain, and we guess You know what we need and we hope that You will take them all to Heaven."

Little Katharine Cayer and her brother Ben, 10 and 12 years old, were the first to discover that their feathered friends had paid the penalty of the relief that was brought to all. Their father, who lives in the neighborhood, was informed and preparations for a public funeral were made.

Desirable to Be Ready. St. John, Aug. 20.—Hon. Dr. Pugsley, Minister of Public Works, interviewed today, spoke optimistically of the labor prospects throughout the country. He said that the labor market was good, and he said it was always desirable to be ready. Nothing was so good as keeping up the training spirit.

In the house there can be no moral competition, thus the Douglas-Anderson plan which admits of any one thousands of competitors, while it does not interfere with the usual manner whenever desired.

IN CALGARY IN 1922. An Old Timer Visits the Southern City.

Calgary, Aug. 19.—One of the real old timers of the West has been stopping at the Altavista hotel in Calgary for the past few days. This is Mr. W. F. King, of Ottawa, who is commissioner for the Pacific to the Great Lakes and from the St. Lawrence to the Atlantic.

Mr. King is also commissioner for the survey of the Alaska boundary from the Portland canal to the Arctic ocean. The work has been going on for a number of years, and is of a most interesting character, as the southern part of the line runs over mountains and glaciers, making the work of a very difficult character.

Mr. King came to the city as early as 1922, or two years before Col. Walker was in the city. In 1922 he held a subordinate position with the international boundary survey from the lake of the Woods to the Rockies, the work being completed in 1924.

"At that time," said Mr. King, "I had been in the city for three months, making a very striking picture to one seeing them for the first time. 'Of course,' said Mr. King, 'there was very little of what is now the city of Calgary. The place then I came here was in 1920. There were a few mounted police, the old Hudson Bay store and the store of J. C. Bell & Co., but very little else. They were located in the city, and the city was in the process of building up until the advent of the railway."

"I remember," Mr. King went on, "the delighted time I used to have when we were camping on the banks of the river at that time. Sometimes I would throw a line into the river, and a trout a foot long would come up, making a very agreeable addition to our meals of bannocks and beans."

After 1920 Mr. King was engaged in geological work on the prairies up to the North Saskatchewan, and he was also inspector of survey at the time of the construction of the C. P. R. He was in the city for the first time in the first house in Medicine Hat, and says it is strange to come back and see what were once here places of dwelling and thriving with life.

AMERICANS ARE IDEALISTS. Says Hughes—Liber to Say They are At-Legat Ben Riches. Cliff Haven, N.Y., Aug. 19.—Mr. Hughes was enthusiastically received on his visit by the Catholic summer school at Cliff Haven. The president of the school, Dr. John Talbot Smith, introduced the governor, saying: "When next year St. John's celebrates the centenary of the discovery and we have Samuel de Champlain in the hall of Cliff Haven, we hope it will be Mr. Hughes of New York who will represent our great state."

Mr. Hughes, in the course of his remarks, said: "The American people are idealists. The man who goes about picturing out communities as ideal with none having any higher ideal than the amassing of wealth, thinking solely of selfish enjoyment, after the barest lust upon the successful man, the leader in business, in politics, or in any of the activities of our great life, true to the spirit of the heart of the average American, we should have no cause for alarm."

"The American people are full of zeal for good things, good deeds, of their fathers are still cherished in their hearts, the spirit of liberty and the desire to maintain incorruptibility of their institutions are just as conspicuous today, if the sense of the times is truly felt as it was of the time of '76."

A Clever Capture. Belvedere, Aug. 20.—Constable Macpherson, of the Mounted Police, made a clever capture this week of a man who had been in the city for some time, after a chase of over two hundred miles, and having in his possession a large number of stolen goods, and frequently eluded capture, was wanted for the robbery of the Hudson Bay store at Touchwood, and Justice Morrison and Lindenberg gave him a heavy sentence.

BANK OF MONTREAL Established 1817.

E. C. PARDEE, Manager Edmonton Branch.

SPILLS RUIN FOR MOTORISTS.

No Limit to Amount of Damages Under Auto's New Law.

Winnipeg, Aug. 20.—Controversation has been caused among motorists by the new law regarding motor traffic. The full import of the measure, having been explained by Dr. Emil Frischauer, a well known Winnipeg solicitor.

Dr. Frischauer says that the new law, so far as it is concerned with compensation that may be exacted from a motorist for damage caused by or to his car, he is responsible for the damage done by frightened horses, and the amount he has to pay may be fixed by any small local tribunal. There is no limit to the amount of compensation that may be exacted from a motorist for damage caused by or to his car, he is responsible for the damage done by frightened horses, and the amount he has to pay may be fixed by any small local tribunal.

"Damage limit," and in view of the enormous liability of certain districts to motorists a fortune might easily be lost.
